# Chinese Solar Industry Targets Booming Middle East Market by WFES 2017

#### According to Analysis by Frost-Sullivan

Paris, Wahsington DC, Abu Dhabi, 14.01.2017, 14:48 Time

**USPA NEWS -** Chinese solar panel manufacturers are targeting the Middle East, North Africa, and South Asia markets, with large-scale investment in renewable energy expected to drive a rapid increase in demand for imported technology. The study carried by Frost and Sullivan for the World Future Energy Summit 2017

"When solar energy was seen as experimental in the region, and oil revenues were high, many decision makers automatically looked for Western partners, particularly from Europe, "? said Ms. Li Dan, Vice Executive Secretary-General, Chinese Renewable Energy Industries Association. "Looking ahead, decisions will be based on purely commercial factors. Chinese companies can provide the quality, the capacity, and the commercial viability to put renewables at the centre of the energy mix."?

INDUSTRY ANALYSIS PRODUCTS IN THE GCC WILL GRIW AT A RATE OF 3.74%-------

That opportunity is driving a surge of Chinese interest in the 10th edition of WFES. As the Middle East's largest exhibition and conference for renewable energy, with a particular focus on the business of renewables, the annual event consistently attracts buyers for renewable energy projects from an area that stretches from Africa, across the Middle East, and into India.

As falling oil revenues put pressure on budgets, the Chinese suppliers' established reputation for value, combined with their increasing reputation for quality and innovation, make them highly competitive.

A VERY STRONG NUMBER OF CHINESE COMPANIES COME TO WFES------

"We have seen very strong growth in the number of Chinese companies coming to WFES, with the number of exhibitors now among the highest for any country, and their strength in the MENA and South Asian markets is growing, "? said Naji El Haddad, Group Event Director for Reed Exhibitions, which organises WFES in partnership with Masdar. "China has become a powerful force in the region's accelerating renewable energy industry, with several Chinese exhibitors at WFES ranked among the 10 largest solar manufacturers in the world." First held in 2008, WFES aims to build the business case for renewable energy. Hosted by Abu Dhabi's renewable energy company, Masdar, as Part of Abu Dhabi Sustainability Week, the 2017 edition will be held at the Abu Dhabi National Exhibition Centre from 16 to 19 January.
